

Classroom Attendance Prediction Dashboard

Academic Capstone Demonstration & Visual Application Report

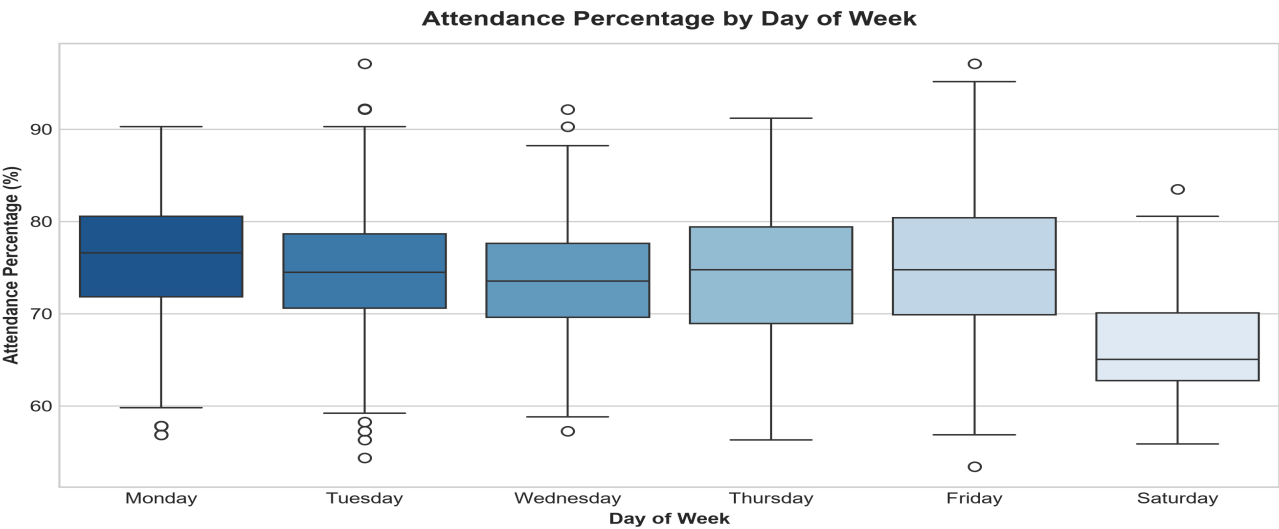

1. Overall Attendance Analytics

Visualizes the global attendance percentage distribution, mean/median values, andTerm turnout spread.

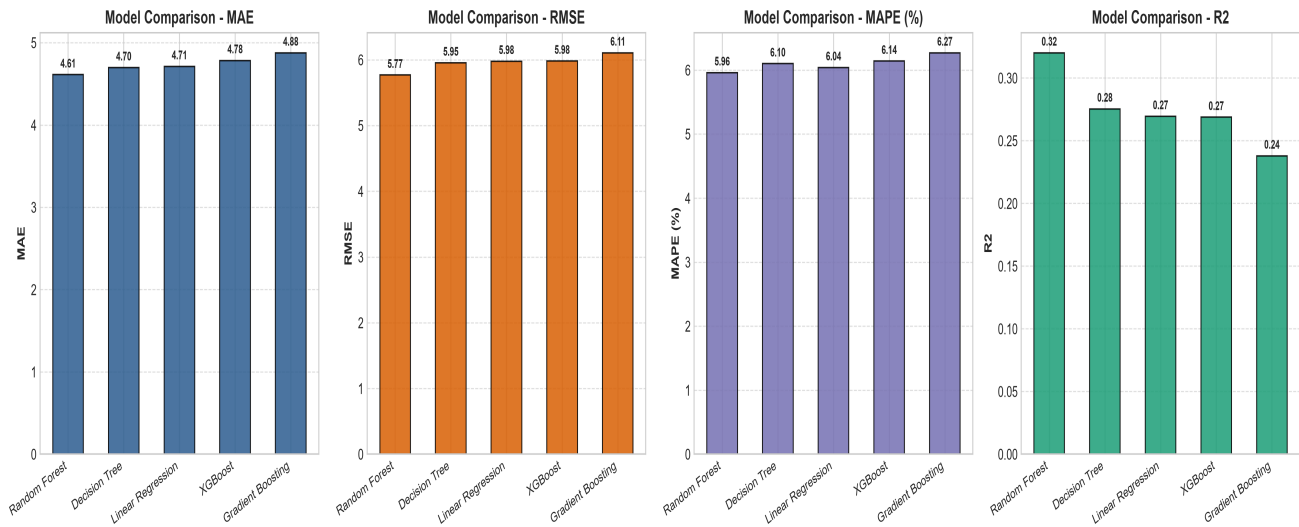

2. Day-of-Week & Period Slot Dynamics

Highlights mid-week consistency vs. Monday/Saturday fatigue patterns.

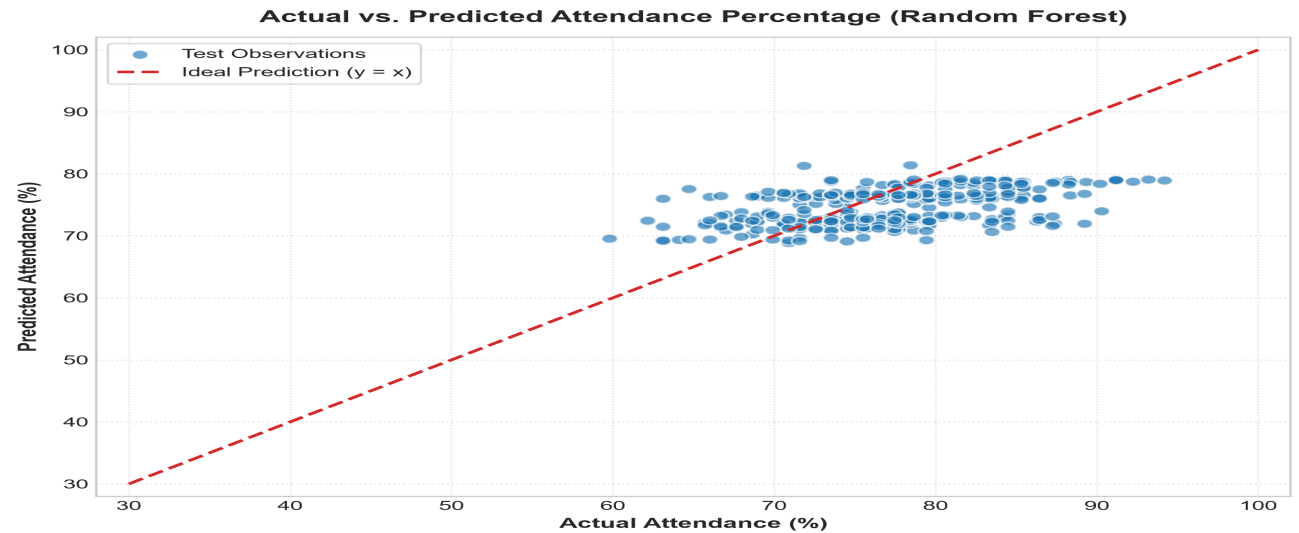

3. Model Comparative Evaluation Benchmark

Rigorous multi-model error benchmarking across Linear Regression, Decision Trees, Random Forest, Gradient Boosting, and XGBoost.

4. Actual vs. Predicted Attendance (Holdout Split)

Validates predictive calibration along the 45-degree parity ideal regression line.

5. Explainable AI & Feature Importance

Identifies the highest-signal timetable and autoregressive predictors driving turnout forecast.
